$$\begin{array}{r} 15,4 \\ + 12,8 \\ \hline \end{array}$$

A blank coordinate grid with a horizontal red line at $y=1$. The grid is 10 units wide and 10 units high. The red line is at the first horizontal grid line from the bottom.

A blank coordinate grid with a horizontal line drawn across it. The grid is 10 units wide and 10 units high. The horizontal line is drawn at the 5th unit from the bottom. The grid is divided into four quadrants by the horizontal line and a vertical line at the 5th unit from the left. The quadrants are labeled with Roman numerals: I in the top-right, II in the top-left, III in the bottom-left, and IV in the bottom-right.

A blank coordinate grid with a horizontal line drawn at $y = 1$. The grid is 10 units wide and 10 units high. The horizontal line is drawn at the first grid line from the bottom.

A blank coordinate grid with a horizontal red line. The grid is composed of small squares, with a larger square in the center. The horizontal red line is positioned at the bottom of the grid, passing through the center of the bottom row of the central square.

$$\begin{array}{r} 5,46 \\ + 3,825 \\ \hline \end{array}$$

A blank grid with a horizontal red line across the middle. The grid is composed of small squares, and the red line is positioned exactly halfway down the page.

[illegible]

A blank 10x10 grid with a horizontal red line across the middle. The grid is composed of small squares, and the red line runs horizontally through the center, dividing the grid into two equal halves of 5 rows each.

A blank coordinate grid with a horizontal red line at the bottom. The grid is composed of small squares, with a larger square in the top-left corner. The red line is positioned at the bottom of the grid, spanning the width of the page.

A blank coordinate grid with a horizontal red line at $y = 0$. The grid is 10 units wide and 10 units high. The red line is at the bottom of the grid.

A blank coordinate grid with a horizontal red line at $y = 0$. The grid is 10 units wide and 10 units high. The red line is at the bottom of the grid, representing the x-axis. The grid lines are spaced at 1-unit intervals.

A blank coordinate grid with a horizontal red line at the bottom. The grid consists of a 5x5 array of squares. The bottom-most row is highlighted with a thick red line. The grid is used for plotting the graph of the function $f(x) = 2x^2 - 1$.

A blank sheet of graph paper featuring a light blue grid. The grid consists of small squares formed by thin blue lines. Two prominent horizontal red lines run across the width of the page, dividing it into three main sections. A vertical blue line runs down the left side, creating a margin.

A blank sheet of graph paper with a grid pattern. The grid consists of small squares formed by light blue lines. There are two horizontal red lines running across the page, dividing it into three main sections. The top section is approximately one-third of the page height, the middle section is the largest and occupies about half the page, and the bottom section is also approximately one-third of the page height. The grid covers the entire area of each section.

[illegible]

A blank sheet of graph paper with a grid pattern. The grid consists of small squares formed by light blue lines. There are two prominent horizontal red lines running across the page, dividing it into three main sections. The top section is approximately one-third of the page height, the middle section is about half, and the bottom section is about one-third. The grid covers the entire area of the page, including the sections defined by the red lines.
